## The Equation of Medians

1. In triangle $A B C$, find the equation of the median through $A$.

2. A triangle has vertices $X(-2,-3), Y(6,1)$ and $Z(5,8)$.

Find the equation of the median through $Z$.
3. Find the equations of all three medians in the triangle with vertices $A(2,6), B(8,-4)$ and $C(-2,4)$.
4. Using the triangle $A B C$, shown,

(a) Prove that The vertex at $B$ is right angled.
(b) Find the equations of medians $A D$ and $B E$.
(c) Find the point of intersection of $A D$ and $B E$.
